

Shaped & Flat Wire for Stamped Parts Manufacturing

PRECISION SOLUTIONS THAT SIMPLIFY PRODUCTION

Ulbrich Shaped Wire helps stampers achieve shapes and edges that aren't possible or practical to form with strip on a press. Think part designs with custom edges, unique profiles, or dual gauges that would complicate your stamping process when trying to form them conventionally.

Ulbrich
SHAPED WIRE

OUR FLAT & SHAPED WIRE SOLUTIONS MAKE STAMPING EASIER & MORE EFFICIENT. HERE'S HOW:

Achieve Unique Profiles:

From specialty bevels and square or rounded edges to cotter pin shapes and dual gauge sections, we can roll in the custom profiles you need. This reduces secondary forming and extends the life of stamping dies.

Eliminate Secondary Steps:

Pre-rolled features reduce the need for complex forming operations in the press.

Large, Weld-Free Coils:

Our oscillate-wound coils minimize changeovers, maximize uptime in your stamping operation & eliminate the need to handle pancake coils.

Go Wider When Needed:

We're not limited by typical wire widths. Our unique capabilities allow us to create wider profiles by shaping precision strip into a hybrid product tailored to your exact needs.

Flexible Order Quantities:

While flat wire production has smaller minimums than custom strip, helping you manage costs for prototypes and short runs, we also support large-volume orders.

160+ Alloys for Every Application:

Including 300/400 series stainless, high-temp nickel alloys like Inconel® and Monel®, plus titanium, even for small-volume or specialty jobs.

Count on Our Experience:

With more than 50 years of wire shaping, Ulbrich has the know-how to supply material that meets your toughest stamping challenges.

A Partner for Any Approach:

Ulbrich isn't just a precision strip supplier. We're also your shaped wire product development partner, helping you find the right mix of metal products: whatever helps you stamp smarter and faster.

PARTNER WITH ULBRICH

Create shapes, edges, and profiles that keep your stamping lines running smoothly. Don't hesitate to reach out if you have questions about how we can help.
