**Re: Ulbrich Stainless Steels & Special Metals comments on Radioactive Stainless Steel from India**

To Whom It May Concern:

Ulbrich Stainless Steels & Special Metals has recently been made aware of the issue regarding “Radioactive contaminated Stainless Steel from India”. As a Corporation Ulbrich purchases all Stainless Steel products from approved integrated Mills that have high level of controls with respect to Radioactive contamination detection and prevention. All material purchased by Ulbrich is free from Radioactive contamination.

Sincerely,

Patrick Robb  
Corporate Director of Quality  
Ulbrich Stainless Steels & Special Metals
